

Load Resistor Air Cooled

Application:

Air cooled load resistor 1.6ohm, continuous 30kW at 220V. Consisting of stainless steel load resistors mounted in stainless steel AISI 316L duct. For cooling of the elements, a fan 4/6 pole with the following data has been mounted:

0.30kW 1730 r/min 400V Y 60Hz

0.10kW 1170 r/min 400V Y 60Hz

The fan blades has been surface treated by DELTA seal.

2 off PT-100 sensors with built-in resistors are mounted for measuring the temperature.

Part No.:

203526001

Technical data:

Continuous:	1.6 ohm, 30kW at 220V
Cooling fan:	0.30kW, 1730r/min, 400V/60Hz
Sensing:	PT100
